

PROFESSIONAL SUMMARY

Data Science Engineering student at ESPRIT, specialized in building production-ready AI products across finance, banking, and healthcare. Expertise spans LLMs, RAG pipelines, and MLOps , from model training and fine-tuning to full-stack deployment. Seeking a full-time AI Engineer role.

INTERNSHIPS

AI Credit Risk Engineer | Amen Bank Feb 2026 – Jun 2026

- Architected a production ready credit scoring platform on real Amen Bank loan data ,React · Node.js · FastAPI · PostgreSQL, containerized with Docker Compose, shipped via GitHub Actions CI/CD
- Trained an EasyEnsembleClassifier on 22,000+ imbalanced records (12:1 ratio) with WoE/IV feature selection and Platt scaling calibration, automating PD/LGD/EAD decisions compliant with IFRS 9 & Basel III
- Built an NLP pipeline (LangChain · ChromaDB · nomic-embed-text) over regulatory documents, powering a RAG chatbot (Llama 3.3-70B) with role-aware multilingual (FR/EN) credit explanations via SHAP + prompt engineering
- Delivered PSI drift monitoring, batch inference on 25,000+ applications, what-if simulation and portfolio analytics , secured with JWT, RBAC, rate limiting and full audit logging

AI Engineer Intern | Value June 2025 – August 2025

- Architected an Agentic AI system (LangChain · AutoGen · FastAPI) with autonomous multi-agent workflows for decision making and task coordination across Microsoft Azure services
- Integrated Azure AI services with Power Automate to orchestrate intelligent pipelines, reducing manual intervention across automated business workflows
- Designed and exposed REST APIs enabling seamless inter-agent communication, optimized for scalability under production load

AI Engineer Intern | Value Jan 2025 – Jun 2025

- Developed a Django-based application integrating advanced semantic segmentation, a RAG architecture, and automated fact-checking mechanisms.
- Designed intelligent PPTX reports automatically generated using LLMs, connected to real-time financial APIs.
- Deployed scalable microservices capable of handling 10,000+ daily requests with 99.9% availability.
- Award: Best Project of the Year (ESPRIT 2025), selected among 200+ competing projects.**

Software Engineer Intern | Sahara and Sahel Observatory June 2024 – August 2024

- Built a responsive Symfony web app for the OSS conference, enhancing staff management, event logistics, and overall user experience.

Intern | EO Data center June 2022 – July 2022

- Participated in an internship focused on networking and systems administration using Cisco technologies, gaining hands-on experience with routers, switches, and protocols.

TECHNICAL SKILLS

- Programming Languages:** Python, R, JavaScript, SQL, Php
- Frameworks & Libraries:** Django, FastAPI, Scikit-learn, TensorFlow, PyTorch, OpenCV, Transformers, React, LangChain, Symfony
- AI/ML Specializations:** LLM, RAG, NLP, Computer Vision, Anomaly Detection, Multi-Agent Systems
- Cloud & DevOps:** AWS, Docker, Kubernetes, PostgreSQL, MongoDB, MySQL, Git, CI/CD
- Soft Skills:** Leadership, Project Management, Collaboration, Problem-solving, Scrum

NOTABLE PROJECTS

Churn Prediction with MLOps

Identified customers at risk of churn using XGBoost (87% F1-score) and business indicators, automated with MLOps for retraining and monitoring. Reduced update time by 60% via CI/CD.

Brain Tumor Detection Platform

Trained CNNs and transfer learning models (DenseNet121, VGG16) to detect tumors in MRI scans, achieving 94% accuracy and 30% faster training.

Fraud Detection

Designed a production ready fraud detection pipeline with real time threshold tuning, KPI monitoring, and dockerized deployment, achieving 93% fraud recall on real world data.

AI CV Ranking System

Built an end-to-end CV ranking pipeline using Python, HuggingFace MiniLM, ChromaDB, Groq LLM, SHAP, and LIME.
Implemented semantic search, LLM-based evaluation, hybrid scoring, and XAI explanations to rank 3K+ resumes with high accuracy.

EDUCATION

ESPRIT – École d'Ingénieurs	2021 – 2026
IEngineering degree in Computer Science, specialization: Data Science	
Wall street english	2021 – 2023
English language training (advanced program)	
ESPRIT – High School	2017 – 2021
Baccalaureate in Mathematics	

DISTINCTIONS

ESPRIT Project Gala – 9th Edition	2020–2021
ESPRIT Project Gala – 12th Edition	2024–2025

LANGUAGES

French : B2
English : B2
Arabic : native

CERTIFICATIONS

- NVIDIA Certificate of Competency** Building Transformer-Based NLP Applications(2025)
- NVIDIA Certificate of Competency** Evaluation & Light Customization of LLMs (2025)
- Attendance Hashgraph Developer (2025)
- AWS Academy Graduate** Cloud Foundations – Training
